Facing the aid gap and the gradual decarbonization of energy systems, in terms of the differentiated energy investment for green-oriented hydropower, the Company continues to expand the hydropower capacity. At present, the hydropower IV project of the Group's hydropower has been completed, which is expected to begin operation in 2023 according to the construction progress. In addition, the Group actively participated in the bidding for hydropower capacity of 1,200 MW in Nanning City, Jiangsu Province, which created the hedging advantage for accelerating construction.

With the significant carbon reduction pressure and carbon neutrality goal proposed, the group actively developed the hydropower capacity achieved fruitful results. For the past decade, in light of the central arrangement of the national strategy in the energy field, hydropower resources have become the priority development energy. In this regard, hydropower resources are expected to become the main force of the development of clean energy in China and the world.

Leveraging the fact that hydropower projects, hydropower generation becomes the early mature renewable energy technology. In terms of the differentiated energy investment for green-oriented hydropower, the Company continues to expand the hydropower capacity. The total installed capacity of the Company as of 31 December 2022 is 19,400 MW /da T1 MW for g5 for g5

On 17 August 2021, the Company adopted the Restricted Share Unit Scheme (Scheme). The principal terms of the Scheme are as follows:

(a) Participants

Any employee, director or officer of the Company, any member of the group or any associated company of the Company, and any other person who has contributed or will contribute to the Company and/or the group, as determined by the Board, in its absolute discretion, to be eligible to participate in the Scheme.

(b) Administration

The Scheme is administered by the Remuneration Committee comprising all the non-executive Directors of the Company.

(c) Maximum number of Shares

The total number of Shares which may be granted under the Scheme is 5,947,858, representing approximately 0.28% of the total issued share capital of 2,146,893,254 Shares of the Company as at the date of adoption, of which the maximum number of Shares which may be granted to a Participant is 5,353,072 Shares, representing approximately 0.25% of the total issued share capital of 2,146,893,254 Shares of the Company as at the date of adoption and 90% of the total number of Shares available under the grant; the maximum number of Shares which may be granted to a Controlling Shareholder is 594,786 Shares, representing approximately 0.03% of the total issued share capital of 2,146,893,254 Shares of the Company as at the date of adoption and 10% of the total number of Shares available under the grant.

(d) Maximum entitlement of each Participant

The total number of Shares granted under the Scheme to each Participant in any Validity Period must not exceed 1.00% of the Company's total share capital. The total number of Shares granted under the Scheme during the Validity Period must not exceed 10.00% of the total share capital of the Company at the Scheme Adoption Date. The Restricted Share Option must not exceed 20.00% of the total number of Shares available under the Scheme. If the Participant is a Controlling Shareholder, the Board has to exercise discretion to the number of Shares granted.

For FY2022, financial cost of the Group amounted to RMB240.43 million, representing an increase of 357.79% from RMB52.52 million in FY2021. On the one hand, the increase was due to the gradual repayment of Sanmina and Dahua Minsheng as the increase ended during the year; on the other hand, the increase was due to the cessation of Asset-backed Securities issued by the Company, and the change in financial expenses. The major source of income for the Company is from the bidding of the Company's products in the PRC and its export sales in RMB. However, certain raw materials of the Group are imported from the United States, the European Union, Japan and Vietnam, which are settled in foreign currencies.

The interest rate of bank loans ranged from 0.79% to 4.70% in FY2022, as compared to the interest rate ranging from 0.79% to 4.90% in FY2021.

For FY2022, the income tax of the Group amounted to RMB30.10 million, representing a decrease of 88.44% from RMB260.30 million in FY2021. Pursuant to the Announcement of the Ministry of Finance, the State Taxation Administration and the Ministry of Science and Technology on Enhancement of the Pre-tax Deduction in Scientific and Technological Innovation (No. 28 2022), high-tech enterprises are entitled to the preferential tax policies. Therefore, the actual tax rate decreased from 10.94% in FY2021 to 1.40% in FY2022. Details of tax incentives of the Company and certain subsidiaries are set out in Note (VI) 54 to the financial statements in this report.

During the Reporting Period, the Group's operating cash flow amounted to RMB8,071.33 million (FY2021: RMB3,768.70 million), in the high-tech zone of Huizhou, which mainly included the sales of Phase II, III of Avenue and Phase II of Jiaming Road.

Total assets of the Group increased from RMB20,082.92 million as at 31 December 2021 to RMB32,381.72 million as at 31 December 2022. Shareholders' equity increased from RMB11,810.17 million as at 31 December 2021 to RMB14,032.45 million as at 31 December 2022.

During the Reporting Period, the Group issued bonds with an aggregate amount of RMB8,548.82 million and repaid debts of RMB4,050.79 million. For FY2022, the Group's financial expenses were mainly affected by the interest expenses of Asset-backed Securities, cash flow hedging instruments and exchange differences.

For FY2022, EBITDA of the Group (earnings before interest, taxes, depreciation and amortization) increased by RMB765.25 million from RMB2,979.31 million for FY2021 to RMB3,744.56 million. For FY2022, the EBITDA margin of the Group was 24.22% and the EBITDA margin was 34.19% for the same period in 2021.

As a result of the foregoing, the net profit increased by RMB2.86 million, or 0.13%, from RMB2,119.92 million for FY2021 to RMB2,122.78 million for FY2022.

As at 31 December 2022, the gearing ratio (gearing ratio equals total debt divided by total equity as of the end of the relevant period multiplied by 100%. Total debt includes the bank borrowings of the Group) was 56.67%, increased by 15.48 percentage points as compared with 41.19% as at 31 December 2021, mainly due to the increase in bank borrowings for the construction of Sanmenxia Dahuashan Mining and the acquisition of the three subsidiaries of Linghai-Minhai Mining Zone, Fengfeng Coal. As at 31 December 2022, 20.83% of the Company's bank borrowings were secured-and-guaranteed borrowings, 79.17% were unsecured-and-unguaranteed borrowings, and the interest rates ranged from 1.30% to 4.70% per annum.

As at 31 December 2022, the total carrying amount of pledged assets, including equity securities, construction in progress and intangible assets of the Group was RMB4,514.41 million, which were pledged to bank credit facilities. Note: Receivables pledged by the Group with the carrying amount of RMB509.57 million were pledged to bank credit facilities.

The Group implemented dynamic financial policies with the objective of maintaining the Group's financial flexibility through optimizing financial efficiency and lowering financial costs. The Group regularly reviewed the financing needs of its subsidiaries to ensure sufficient financial resources for the Group's operations and future development.

Credit risk and foreign exchange risk

The Board recognizes the importance of good corporate governance in the management to enhance the confidence of the Group's shareholders and the decision making and ensure accountability and transparency.

In the opinion of the Directors, the Company has complied with the code provisions in the Corporate Governance Code (CG Code) as set forth in Appendix 14 to the Rules Governing the Listing of Securities (the Listing Rules) on the Stock Exchange during the year ended 31 December 2022 except for code provision A.2.1.

Under code provision A.2.1 of the CG Code, the roles of the chairman and chief executive should be separated and should not be performed by the same individual. Mr. Rao Hongjiang currently holds both positions. Throughout the Group's history, Mr. Rao has been deeply involved in the formulation of corporate strategies and management of business operations of the Group. Taking into account the Company's current circumstances, the Board considers that Mr. Rao is the best candidate for both positions and the current arrangement will be beneficial to the Company and the shareholders as a whole.

The Board currently comprises five executive Directors and three independent non-executive Directors. Biographical details of the Directors are set forth on page 25 to 28 of this annual report.

The Directors during the year ended 31 December 2022 were:

Mr. Rao Hongjiang
Mr. Jiang Jinhua
Mr. Wei Yehong
Mr. Shen Qifu

Mr. Xu Pan
Mr. Hua Fan
Mr. Ng Yau Kee Calvin

Mr. Rao Hongjiang, executive Director and chairman of the Board, is the spouse of Mr. Jiang Jinhua, executive Director.

Mr. Rao Zeng, a descendant of a range and the cousin of Mr. Rao Hongjiang and Mr. Jiang Jinhua. Mr. Zhou Xiaofei, a descendant of a range of the Company, is the son of Mr. Rao Zeng and the son-in-law of Mr. Rao Hongjiang and Mr. Jiang Jinhua. Other than that, there is no relationship among members of the Board or senior management.

The Board is responsible for the formulation of the Group's long term strategies and business plans, evaluating the Group's performance, determining the Group's dividend policy, overseeing the management of the Group and the internal control and risk management systems of the Group. The Board delegates the day-to-day implementation of business strategies and plans, internal control and risk management procedures and day-to-day management of the Group to the executive Directors and the senior management of the Group. The Board is responsible for the preparation of the financial statements of the Group which give a true and fair view of the state of affairs of the Group and of the results and cash flows for the year. The Directors have accepted the responsibility for the preparation of the financial statements of the Group. Senior management of the Group assists the Board in the preparation of the financial statements of the Group. In order to discharge their duties and responsibilities as Directors of the Group, they have access to adequate information in a timely manner from the Company and may request additional information when necessary. Throughout the year ended 31 December 2022, all Directors have devoted sufficient time to the Company's affairs. The Company has received from each Director an annual confirmation of his time commitment to the Board for the year.

The Board meets regularly throughout the year to discuss the overall strategy as well as the operational and financial performance of the Group. The number of the Board meetings and the attendance of each Director at the meetings held for the year ended 31 December 2022 have been set out as follows:

	Board meetings	Audit Committee meetings	Remuneration Committee meetings	Nomination Committee meetings	Strategic Development Committee meetings	Risk Management Committee meetings	General meetings

The Board, being responsible for the effective governance of the Stock Exchange, recognises the importance of risk management and internal controls. The Audit Committee assists the Board in overseeing the effectiveness of the Stock Exchange's risk management and internal control systems. The Board is committed to maintaining sound risk management and internal control practices to safeguard the interests of the Stock Exchange and its stakeholders.

For FY2022, the Audit Committee assisted the Governing Board in reviewing the management of the Governing Board's responsibilities for the effectiveness of the Stock Exchange's risk management and internal control systems. Based on the above efforts, the Board considers that the Governing Board has complied with the principles of the CG Code regarding the Stock Exchange's governance for FY2022, and the Governing Board's statement regarding the adequacy and effectiveness of the Stock Exchange's risk management and internal control systems.

The general meeting of the Company provides a platform for direct communication between the Board and the shareholders. The Company encourages shareholders to participate in general meetings or, if they cannot attend, to appoint proxies to attend and vote on their behalf. The Company's articles of association require that at least 21 days' notice be given for annual general meetings and 15 days' notice for extraordinary general meetings. All general meetings, including annual general meetings, are conducted on a poll basis in accordance with the requirements of the Listing Rules. At the commencement of each general meeting, the chairman of the meeting explains the procedures for conducting a poll.

According to the Articles of Association, a shareholder (or two or more shareholders holding not less than 10% of the Company's paid-up voting share capital) may request an extraordinary general meeting to be convened by depositing a written requisition with the Board or the Company Secretary. The requisition must state the purpose of the meeting and be signed by the requisitionists. The Board shall convene the extraordinary general meeting within two months after the deposit of the requisition. The requisitionists may themselves convene a meeting if the Board does not proceed to convene the meeting within 21 days of the deposit of the requisition. The meeting so convened shall not be held after the date three months from the deposit of the requisition.

If the Board cannot or fails to convene a general meeting, the board of directors of the Company shall convene such meeting. If the board of directors of the Company also cannot or fails to convene a requisitioned general meeting, the shareholders holding not less than 10% of the Company's paid-up voting share capital may convene a general meeting, the reasonable expenses incurred by the requisitionists shall be reimbursed by the board of directors of the Company.

Where a shareholder proposes a resolution at a general meeting, the Board fails to convene the general meeting as requested, and the shareholder has paid the expenses incurred by the Company, such expenses shall be reimbursed by the Company.

Note:

1. This requirement is expected to have, and should be fulfilled by the Public Offering of A Shares before the first Share of the Company.

2. The Proceeds of the Public Offering of A Shares will be utilized according to the arrangement.

3. The Proceeds of the Public Offering of A Shares will be utilized according to the requirement, and the requirement is expected to be completed before end of 2023.

4. The Proceeds of the Public Offering of A Shares will be used to supplement working capital, which is expected to be used within the validity period of the Proceeds.

As at the date of the report, the Directors confirm that the Proceeds are expected to be used according to the intention set out in the Prospectus.

Except as disclosed above, either the Company or any of its subsidiaries had not changed, or proposed to change any of the Company's business plans as mentioned in the Prospectus during the period from 1 January 2022 to 31 December 2022.

In order to protect the legal rights and interests of the Company's shareholders, enhance the Company's corporate governance, maintain the stability of the Company's share price, and safeguard the healthy development of the Company, on 12 June 2020 and 15 June 2020, the Board and the shareholders' general meeting of the Company considered and approved the proposal in relation to the Public Offering of A Shares and Listing on the Shanghai Stock Exchange. On the 2020 second extraordinary general meeting, 2020 second A Shareholders' class meeting and 2020 second H Shareholders' class meeting held on 10 August 2020. On 12 October 2020, the Listing Committee of the CSRC conducted a review on the Company's application for Public Offering of A Shares. Pursuant to the relevant provisions, the Company's application for Public Offering of A Shares was approved.

The shares to be issued under the Public Offering of RMB denominated ordinary shares (A Shares) with a par value of RMB0.25 each, which will be listed on the Shanghai Stock Exchange. On 18 January 2021, the

As at 31 December 2022, the interests and short positions of the Directors, supervisors and chief executives of the Company in the shares (the Shares), underlying Shares or debentures of the Company and its associated corporations (within the meaning of Part XV of the Securities and Futures Ordinance (the SFO)), which were required to be recorded by the Company pursuant to section 352 of the SFO; or as otherwise notified to the Company and the Stock Exchange pursuant to the Divisions 7 and 8 of Part XV of the SFO (including interests and short positions which the Directors and chief executives were deemed or taken to have under such provisions) and the Model Code for Securities Transactions by Directors of Listed Companies (the Model Code) contained in the Listing Rules, were as follows:

Shareholder	Number of Shares held	Class	Nature of interest	Approximate percentage of shareholding in the relevant class of Shares[1]	Approximate percentage of shareholding in the total share capital of the Company[2]

(3) M. Ra Hongjian, the spouse of M. Jiang Jinhua. As at 31 December 2022, M. Ra Hongjian held 463,050,187 A Shares and 485,000 H Shares. M. Jiang Jinhua held 341,557,235 A Shares and 111,000 H Shares. M. Ra Zexiang, the spouse of M. Zhao Xiaofei, and the daughter of M. Ra Hongjian and M. Jiang Jinhua. M. Ra Zexiang held 369,264,144 A Shares and 973,000 H Shares. M. Zhao Xiaofei held 5,058,842 A Shares. On 31 March 2022, the Company granted the grant of 10,355,680, 7,638,600, 8,262,040 and 113,140 A share options to M. Ra Hongjian, M. Jiang Jinhua, M. Ra Zexiang and M. Zhao Xiaofei, respectively. As at 31 December 2022, M. Ra Hongjian, M. Jiang Jinhua, M. Ra Zexiang and M. Zhao Xiaofei held 10,355,680, 7,638,600, 8,187,820 and 113,140 A share options granted, respectively, which A share options entitled to 23,691,787, 17,475,635, 18,732,144 and 258,842 A shares, respectively. Pursuant to an acting in concert agreement dated 19 September 2016 entered into among M. Ra Hongjian, M. Jiang Jinhua, M. Ra Zexiang and M. Zhao Xiaofei, each of M. Ra Hongjian, M. Jiang Jinhua, M. Ra Zexiang and M. Zhao Xiaofei is considered to be interested in 1,108,798,241 A Shares and 1,569,000 H Shares under the SFO.

As at 31 December 2022, M. Ra Hongjian, M. Jiang Jinhua and M. Ra Zexiang had 8,845,670, 7,630,000 and 5,000,000 A share options granted to them under the Share Award Scheme, which A share options entitled to 20,237,177, 17,455,960 and 11,439,030 A shares, respectively.

(4) On 1 March 2022, the Company granted the grant of 367,710 A share options to the Shanghai Stock Exchange Participants. M. Wei Yeqing received the grant of 338,370 A share options which A share options entitled to 774,125 A shares. As at 31 December 2022, M. Wei Yeqing held 338,370 A share options which A share options entitled to 774,125 A shares.

(5) On 1 March 2022, the Company granted the grant of 245,140 A share options to the Shanghai Stock Exchange Participants. M. Shen Qifeng received the grant of 245,140 A share options which A share options entitled to 560,833 A shares. As at 31 December 2022, M. Shen Qifeng held 245,140 A share options which A share options entitled to 560,833 A shares.

Save as disclosed above, as at 31 December 2022, to the knowledge of the Company, none of the Directors or supervisors or the chief executive of the Company had any interests or short positions in the Shares, underlying Shares or debentures of the Company and its associated corporations (within the meaning of Part XV of the SFO) which are required to be recorded in the register required to be kept by the Company under Section 352 of the SFO, or as otherwise required to be notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO or to be notified to the Company and the Stock Exchange pursuant to the Model Code.

As at 31 December 2022, the register required to be kept by the Company pursuant to Section 336 of the SFO showed that the following persons had interests or short positions in the Shares, underlying Shares or debentures of the Company which would fall to be disclosed to the Company under the provisions of Divisions 2 and 3 of Part XV of the SFO, or which were recorded in the register required to be kept by the Company pursuant to Section 336 of the SFO were as follows:

(5) Evaluate the overall presentation (including disclosures), and consider whether the financial statements fairly reflect the relevant transactions and events;

(6) Obtain sufficient appropriate audit evidence regarding the financial information of entities or business activities within the Group to express opinions on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

On 25 March 2021, the Company held the second meeting of the third session of the Board, at which the Resolution in relation to the Restricted Grant of the Restricted A Share to Participants and Grantees was considered and approved. The participants who subscribed for 700,000 RMB denominated ordinary shares (A Shares), with a price of RMB0.25 per share at a grant price of RMB14.23 per share. Upon the completion of the above grant of restricted shares, the registered capital of the Company became RMB536,723,313.50.

As approved by the China Securities Regulatory Commission, the Company issued 40 million A Shares to specific investors at RMB100 each on 20 May 2022. The total amount of this issuance RMB4,000,000,000.00 and the net proceeds 6 billion. Pursuant to the Listing of Stock on Shanghai Stock Exchange and the Registration and Management of Shares of Companies Listed on the Shanghai Stock Exchange and the Shanghai Stock Exchange Guidelines No. 3 for Listed Companies – Issuance of Shares (2022 Revision), the Company's RMB denominated ordinary shares (A Shares) commenced trading on the Shanghai Stock Exchange on 28 November 2022. The initial conversion price is RMB43.94 per share. The Company's initial conversion price was based on the higher of the following: the average trading price of the Company's A Shares over the twenty trading days prior to the announcement date of the prospectus for the initial public offering of A Shares (the "Prospectus"), the average trading price of the Company's A Shares over the last trading day prior to the announcement date of the Prospectus, and the latest audited net asset value per share prior to the issuance of A Shares. On 23 November 2022, the Company adjusted the conversion price to RMB43.71 per share based on the 2022 interim profit distribution plan. During the period from 28 November 2022 to 31 December 2022, the convertible bonds of the Company with a total amount of RMB32,000 were converted into 713 RMB denominated ordinary shares (A Shares) at a conversion price of RMB43.71 per share. Due to the convertible bonds, the registered capital increased by RMB178.25, the number of shares increased by 713 shares and the capital reserve increased by RMB40,713.73.

The principal activities of the Company and its subsidiaries (the Group) are set forth in Note 4 of Financial Statements.

The defacto controllers of the Company are Mr. Ran Hongjiang, Mr. Jiang Jinhai, Mr. Ran Zengdong and Mr. Zhang Xiaofei, of whom Mr. Ran Hongjiang and Mr. Jiang Jinhai are directors of the Company.

On 27 March 2023, the Company's annual financial statements were approved by the Board of Directors of the Company.

Details of the consolidated financial statements of the Group in Note (V) Interests in other entities.

The principal activities of the Group are the manufacturing and sale of glass products. There were no significant changes in the nature of the Group's principal activities during the year, details of which are set out in Note (III) 25, (III) 9, (III) 15 and (III) 18.

The financial statements of the Company have been prepared in accordance with the CASBE, and present truly and completely the Company's financial position as at 31 December 2022 and the Company's operating results and the Company's cash flows for the year then ended. The Company's financial statements for 2022.

The accounting year of the Group is the calendar year, i.e. from 1 January to 31 December of each year.

On preparing the financial statements, the Group has adopted the going concern basis for accounting. The Group's going concern assessment is made for 12 months.

Renminbi (RMB) is the currency in the primary economic environment in which the Company and its subsidiaries operate, The Company and its subsidiaries in the Vietnam operate RMB as their functional currency. The Company, Vietnam subsidiary determines its VND as its functional currency based on the currency in the primary economic environment in which it operates. The currency used by the Company in preparing the financial statements is RMB.

Business combinations are classified into business combinations involving entities under common control and business combinations not involving entities under common control.

For a business combination involving entities under common control, the acquirer identifies the party that obtains control of the combining businesses on initial acquisition date. If the combining businesses ultimately controlled by the same party before and after the combination, and that control is not transitory, the combination is a business combination involving entities under common control. If the combining businesses are not ultimately controlled by the same party, the combination is a business combination not involving entities under common control.

For the purpose of measuring the consolidated financial statements, the foreign currency financial statements are translated into RMB financial statements according to the following methods: assets and liabilities are translated at the spot exchange rate at the balance sheet date; equity items are translated at the spot exchange rate at the transaction date; income and expenses are translated at the average exchange rate for the period (unless the exchange rate fluctuates significantly during the period, in which case the spot exchange rate at the transaction date is used); the difference between the translated amounts of assets and liabilities and the translated amounts of shareholders' equity is recognized in other comprehensive income.

Cash flows arising from foreign currency transactions are translated into RMB at the spot exchange rate at the date of the cash flows. The effect of exchange rate changes on cash and cash equivalents is presented separately in the statement of cash flows as the effect of exchange rate changes on cash and cash equivalents.

The opening balance and the actual figure of the previous year are presented according to the relevant provisions of the previous year's financial statements.

The Group's accounting policies and financial liabilities that become subject to accounting estimates

The Group's accounting policies and financial liabilities that become subject to accounting estimates are mainly based on the Group's business characteristics and industry practices. Specific accounting policies and accounting estimates are mainly reflected in the following: the timing of revenue recognition, the measurement of expected credit losses on financial instruments, the measurement of inventories, the depreciation of fixed assets, the amortization of intangible assets, the measurement of deferred income tax assets, etc.

When financial assets are purchased or sold in a regular way, they are recognized or derecognized on the trading day. Regular way purchases or sales of financial assets refer to purchases or sales of financial assets in accordance with contracts whose terms require delivery of the assets within the time frame generally established by regulation or convention in the marketplace. The trading day refers to the date on which the Group commits to purchase or sell a financial asset.

Financial assets and financial liabilities are initially measured at fair value. For financial assets and financial liabilities at fair value through profit or loss, related transaction costs are directly recognized in profit or loss. For other financial assets and financial liabilities, related transaction costs are included in the initially recognized amounts. For financial assets acquired because of the Group's ordinary activities, the Group initially measures the receivables arising from revenue from contracts with customers in accordance with the Accounting Standard for Business Enterprises No. 14 — Revenue (the Revenue Standard), the Group initially measures the receivables that do not contain significant financing components or do not consider financing components not exceeding one year as defined in the Revenue Standard.

Effective interest rate refers to the interest rate that discounts the future cash flows of financial assets or financial liabilities during the expected duration to the amortized cost of financial assets or financial liabilities or to the amortized cost of financial liabilities at initial recognition. When calculating the effective interest rate, the Group estimates the expected cash flows based on all contractual terms of financial assets or financial liabilities (for example, prepayment, extension, call option and other similar options) but does not consider expected credit losses. The calculation of the effective interest rate includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. If financial assets or financial liabilities have a short expected duration or can be settled at any time at an amount close to their amortized cost, the Group will directly estimate the cash flows based on the contractual terms of the financial assets or financial liabilities and will not consider the expected duration of the financial assets or financial liabilities. If it is impossible to reliably estimate the effective interest rate of financial assets or financial liabilities, the Group uses the contractual cash flows during the contract period of financial assets or financial liabilities to calculate the effective interest rate.

9.1.2 Financial assets at FVTOCI

Gains or losses on financial assets at FVTOCI, interest calculated using the effective interest method and foreign exchange gains or losses are recognised in profit or loss, in the same manner as for financial assets measured at amortised cost. The amounts of the financial assets at FVTOCI that are recognised in profit or loss for each period would be equivalent to the amounts that would be recognised in profit or loss for each period. Upon derecognition of the financial asset, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

After the transition date it is not permitted to designate a financial asset at FVTOCI, the change in fair value of financial assets at FVTOCI are recognised in other comprehensive income. When the financial asset is derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified from equity to profit or loss. Dividends that the Group receives from these investments, the dividend income on equity instruments designated at the Group's right to receive payment of the dividend is established which it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

9.1.3 Financial assets at FVTPL

Financial assets at FVTPL have been measured at fair value. Gains or losses arising from changes in the fair value of financial assets at FVTPL are recognised in profit or loss.

The Group recognises loss allowances for financial assets measured at amortised cost and financial assets at FVTOCI based on expected credit losses (ECL) and exchange differences.

The Group measures the loss allowance for financial instruments at an amount equal to lifetime ECL.

9.2.3 Deterioration of ECL

The Group's financial assets mainly comprise trade receivables from the banking business, financing receivables, bank balances, financial investments, loans to the ecosystem and other receivables. The Group adopts different strategies for different financial assets. The credit risk for financial assets is analysed by the Group periodically, including but not limited to the borrower's repayment ability, industry economic data, etc.

The Group assesses ECL of financial assets on the following methods:

- For financial assets at the credit risk has not increased significantly since initial recognition or the credit risk has increased but is not considered to be credit-impaired, the Group measures the loss allowance for the financial asset at an amount equal to 12-month ECL.
- For financial assets with credit risk increased significantly since initial recognition, the credit risk is assessed based on the remaining duration of the financial asset and the original effective interest rate.

The factors affected the Group's methods of assessing ECL of financial assets include the borrower's credit rating, aging, overdue status, collateral, guarantee, industry, geographical area, debt-to-asset ratio, cash flow, operating income, net profit, current and forecast changes in the operating environment, etc.

9.2.4 Write-off of financial assets

When the Group no longer reasonably expects that the contractual cash flows of financial assets can be recovered in whole or in part, the gross carrying amount of the financial asset will be directly written down. Such write-downs constitute derecognition of financial assets.

A financial asset is derecognised when the Group's contractual rights to receive cash flows from the financial asset expire; (2) the financial asset has been transferred and substantially all the risks and rewards of ownership of the financial asset have been transferred to the transferee; or (3) the financial asset has been transferred, although the Group either retains substantially all the risks and rewards of ownership of the financial asset, it does not retain control of the financial asset.

If the Government either fails to obtain adequate financial assurance or withdraws financial assurance during the term of the contract, it could suspend the contractor's performance with immediate effect, and thereby disrupt the

9.4.1 Classification, reclassification and derecognition (Continued)

9.4.1.1 Financial liabilities at FVTPL (Continued)

For financial liabilities designated as fair value through profit or loss, changes in the fair value of such financial liabilities are analysed into changes in the Group's own credit risk and changes in the fair value due to other factors. Changes in fair value of financial liabilities attributable to changes in the Group's own credit risk are presented in other comprehensive income, unless the treatment of the effects of changes in the Group's own credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss (in which case all gains or losses on such financial liabilities are presented in profit or loss).

9.4.1.2 Other financial liabilities

Other financial liabilities that have financial liabilities with similar characteristics (such as similar contractual interest rate) are measured on an amortised cost basis using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period.

When the Group revises the estimates of payments, the adjustment is recognised as income or expense in profit or loss. For floating rate financial liabilities, the adjustment is recognised as income or expense in profit or loss. For fixed rate financial liabilities, the adjustment is recognised as income or expense in profit or loss. For financial liabilities measured at amortised cost

13.3.1 Long-term investments accounted for using the cost method

Long-term investments in equity instruments that are accounted for using the cost method are initially recorded at the amount paid to acquire the investment. Additional costs incurred in connection with the acquisition, such as brokerage fees, are added to the cost of the investment.

Long-term investments in equity instruments accounted for using the cost method are adjusted for impairment losses when the investment's recoverable amount is less than its carrying amount. When additional investments in equity instruments are made or when investments are disposed of, the cost of the long-term investments accounted for using the cost method is adjusted accordingly. The cash dividends declared by the investees are recognized as investment income.

13.3.2 Long-term investments accounted for using the equity method

The Group's investments in associates are accounted for using the equity method. Associates are entities over which the Group has significant influence.

When adopting the equity method of accounting, if the initial investment cost exceeds the share of the fair value of the investee's identifiable net assets at the investment date, no adjustment has been made to the initial investment cost. If the initial investment cost is less than the share of the fair value of the investee's identifiable net assets at the investment date, the difference has been charged to non-operating income, and the long-term investment has been adjusted accordingly.

When adopting the equity method of accounting, the investment income and the share of the comprehensive income recognized by the investee are adjusted for the share of net profit or loss, the comprehensive income or other equity movements of the investee's equity at the acquisition date. The carrying amount of long-term investments has been adjusted according to the share of the net profit or loss of the investee's equity at the acquisition date; the carrying amount of long-term investments has been reduced according to the declared cash dividends or profits; the carrying amount of long-term investments has been adjusted directly for the investee's other equity movements; the carrying amount has been reduced by the impairment losses. The unrealized profits or losses resulting from transactions between the Group and associates have been eliminated to the extent of the Group's interest in the investees, and on the basis of which investment income or losses have been recognized. Where the accounting policies adopted by associates are inconsistent with those of the Company, adjustments have been made to the financial statements of associates in accordance with the accounting policies of the Company. The investments in associates have been accounted for using the equity method. For transactions between the Group and associates, the amounts receivable from associates have been accounted for in accordance with the relevant policies for bad debt provisions, and the gains arising from transactions with associates have been offset against the carrying amount of the investments. On the balance sheet date, the investments in associates have been tested for impairment, and provisions for impairment losses have been made if there is objective evidence that the investments are impaired.

During the pledging period, if the equity interest granted accepted, the Group will determine whether such equity interest had been granted, in the light of whether the pledgee had exercised its rights during the pledging period in accordance with the provisions of the pledge contract. When the pledgee exercises its rights in accordance with the provisions of the pledge contract during the pledging period, the Group will treat the granted equity interest accepted.

The Group's core principal business of the above-mentioned segments, which mainly comprises hotel management, architectural design, financial management, etc. Refer to the business and operation analysis of principal activities.

The Group recognises the transaction price allocated to each performance obligation when each performance obligation is satisfied, i.e. the control of the goods or service underlying the particular performance obligation is transferred to the customer. A performance obligation is satisfied over time if one of the following criteria is met: the transaction price that the Group receives from customers as consideration for goods or services transferred to the customer. The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties and expected to be refunded to customers.

For the performance obligation to be performed during the reporting period, the Group recognises revenue during the reporting period. For the performance obligation performed in previous periods, the Group recognises revenue when the performance obligation is satisfied during the reporting period. Specifically: (1) the customer receives and consumes the benefits brought by the Group's performance obligation simultaneously; (2) the customer can control the goods under construction of the Group; (3) the goods produced during the Group's performance has irreplaceable use, and the Group has the right to receive payment for the cumulative part of the completed portion throughout the contract period. Otherwise, the Group recognises revenue at the point in time when the customer obtains control of goods or services.

Government grants are recognised when the Group can meet the conditions attached to the grants and can receive the grants.

If a government grant is in the form of monetary asset, it should be measured at the amount received or receivable.

As at the end of the year, the Group had no significant overdue investments.

Note 1: The Company held the 15th meeting of the third session of the board of directors on 13 February 2022, during which it reviewed and approved the Resolution on the Company's Acquisition of 100% Equity of Anhui Dahao Yingtai Mining Co., Ltd.* held by Anhui Fenghai Mining Group Co., Ltd.* and 100% Equity in Yeefeet of Anhui Sanmi Mining Co., Ltd.*, pursuant to which the Company acquired 100% equity of Anhui Dahao Yingtai Mining Co., Ltd.* and 100% equity interest of Anhui Sanmi Mining Co., Ltd.* by assuming liabilities, including payables of RMB3,343,947,600.00. As of 31 December 2022, the Group had paid RMB2,823,000,000.00 in total and the balance payable was RMB520,947,600.00. The identification and recognition of the acquiree's identifiable assets and liabilities have been completed as of 28 February 2022, and the determination of the target company has been completed.

Note 2: Restricted bank deposits mainly refer to the deposits by the associates of the Company after the Company acquired the restricted bank deposits from the ex-shareholders. The Company recognised liabilities for restricted bank deposits additionally in the current year. Please refer to Note (X) for the details of guarantees of restricted bank deposits.

1.1.1 Foreign exchange risk (Continued)

Sensitivity analysis of foreign exchange risk

The following table indicates the sensitivity of the Group's 5% depreciation of the change of foreign exchange rate against the functional currencies of each of the Group's entities (including RMB and VND) to the foreign currencies. The above sensitivity analysis adopted a change rate of 5% which represents the management's assessment of the reasonably possible change of foreign exchange rate. The Group's foreign exchange risk arises from the recognised assets and liabilities denominated in foreign currencies and net investments in foreign operations. In addition to the impact of the depreciation of foreign currencies against the functional currencies, the following table also includes the impact of the appreciation of foreign currencies against the functional currencies.

RMB

Items	Changes in the exchange rates	Amount for the year		As at the end of the year

1.1.2 Interest rate risk

The Group's interest rate risk arises from floating interest rate bearing financial assets and liabilities. As at 31 December 2022, the Group's floating interest rate bearing financial assets amounted to RMB6,527,126,348.86 (31 December 2021: RMB3,442,726,983.63) (see relevant Note (VI), 20 and 30). The management of the Group continuously monitors the interest rate exposure. At present, the interest rate risk managed.

Sensitivity analysis of interest rate

The sensitivity analysis based on the interest rate faced by non-derivative instruments at the end of each reporting period. When interest rate increased by 100 basis points while other factors remained unchanged, the Group's net profit for the year ended 31 December 2022 (excluding the impact of capitalization) is as follows:

RMB

	Closing balance	Opening balance
Decrease in net profit	**45,938,801.19**	18,991,637.02
Decrease in shareholders' equity	45,938,801.19	18,991,637.02

1. Basic pension insurance	1,026,568.62	17,094,966.52	16,226,490.52	**1,895,044.62**
2. Unemployment insurance	36,669.16	589,151.69	558,130.29	**67,690.56**
Total	1,063,237.78	17,684,118.21	16,784,620.81	**1,962,735.18**

The Company participates in pension insurance and unemployment insurance schemes established by government agencies as required. According to the schemes, the Company pays the schemes at 14.0% and 0.5% of the employees' basic wages. Except for the above monthly paid fees, the Group does not bear further payment obligations. The corresponding expenses are recognized in profit or loss in the period in which the employees render services.

The Company has amounts of RMB17,094,966.52 and RMB589,151.69 to the basic pension insurance and unemployment insurance scheme (2021: RMB10,699,758.44 and RMB382,151.95) respectively. At the end of the year, the Company had RMB1,895,044.62 and RMB67,690.56 payable that had been accrued at the end of the year and not paid for the basic pension insurance and unemployment insurance scheme. These payables have been paid after the reporting period.
